

Visit www.b-tokens.eu for more info

We process the potato peel in order to create our eco-tokens

We collect the potato peels

The eco-tokens are sold to festivals and other events

THE LIFE CYCLE OF AN ECO-TOKEN

The potatoes are harvested

They look exactly like regular b-tokens
And they are used in the same way

The farmers grow the potatoes

After about three weeks they will disintegrate into soil

Some of the tokens fall on the ground
